Must mention this form at the time of scheduling your appointment for it to be valid to use

Patient Name, including last name _____

Surgical Authorization:

I hereby authorize Mallard Point Veterinary Clinic to perform these following procedures, operations, and associated anesthesia. I understand that unforeseen conditions may require an extension of a planned procedure or operation. I hereby consent and authorize the performance of such procedures or operations as are necessary and advisable in the professional judgment of the Veterinarian.

I am aware of and have been advised as to the nature of the procedures or operations and the risks involved. I realize that results can't be guaranteed.

Pre-Surgical Blood Analysis:

Routine pre-surgical analysis of blood has been a procedure in human medicine for many years. As veterinary medicine has advanced, now we have the capability to properly evaluate your pet's general health. This blood analysis also can help to evaluate your pet's ability to utilize and metabolize drugs and anesthetics. The detection of underlying problems before surgery is even more important since our patients cannot always tell us how they feel.

The tests we recommend evaluate the major organ functions and other common problems at a particular stage of life. While the performance of these tests does decrease surgical and anesthetic risk, they do not detect all potential problems or eliminate all surgical and anesthetic risk. They do not guarantee results or a cure.

We recommend choosing one of our wellness packages to ensure the best health for your animal or individual items can be chosen below. If you have any questions or need to discuss the options with the veterinarian please talk to them on the morning of your appointment.

**BEST
